

# Task 1

## Create Git Repository

1. First make an empty directory named on the enrollment number as (2202030400004) by the following git commands.

git in it 2202030400004

this creates the empty repository in the desktop or documents.

1. Then create the empty repository named as Assignment-1 by the same command.

This create the empty directory of Assignment-1.

1. Now to come out of the Assignment-1.

git in it command

1. Now make another directory in 2202030400004 folder as Assignment-2.
2. To add files int the directory.
  - Git –add filename.
  - Git status

(it is used to check status of directory).

- Git commit

(it is used to commit the repository).

## Repository on Github

- Go to github and click on create directory.
- Now the empty directory is created in github named as 2202030400004.

- Now add file folder named as Assignment\_1 and Assignment\_2.
- Now add the files in the respective folder as required.
